

Workshare® Compare for Excel®

Compare and Identify Spreadsheet Changes

TOP FEATURES

- Fast and accurate spreadsheet comparison
- Graphically compare changes between two spreadsheets or spreadsheet versions
- Side-by-side and color-coded comparison of changes in context of the original spreadsheet
- Synchronized comparison views even when rows/columns have been added / deleted
- Comprehensive reporting on all change types with filterable results

Workshare Compare for Excel provides spreadsheet comparison capabilities and streamlines your review process making it easier to collaborate and identify changes to Microsoft® Excel® workbooks.

Compare spreadsheets for changes and accuracy

Compare Microsoft Excel spreadsheets and easily identify changes without leaving Microsoft Excel. Collaborating on spreadsheets with colleagues can be challenging, Workshare Compare for Excel provides immediate visibility into changes that have been made to spreadsheets.

Identify every change

Changes can be made quickly to critical spreadsheets, and spreadsheet owners and approvers may have no idea what was changed, or what impact it may have on the spreadsheet results. With Workshare Compare for Excel, users can compare two different spreadsheets or two versions of the same spreadsheet and graphically see the differences.

Accelerate spreadsheet review

With the ability to review spreadsheet changes from month to month the approval process is accelerated. And with visibility into important structural changes that include changes to formulas, macros, pivot tables, queries, and more the integrity of the spreadsheet remains intact.

Review a summary of changes

Review a detailed list of changes that include macros, cell formatting, entered and calculated values, formulas, formula errors, structural changes, names, and data connections.

Each change category is color coded for easy identification and preview grids are synchronized when the user clicks on each change. A bird's eye view of all changes discovered is provided via a statistics bar chart, and all comparison results can be exported to Excel for reporting and further analysis.

Detailed macro comparison

Workshare Compare for Excel enables detailed, line-by-line comparison of macros and VB code. Macro changes can be selected from the comparison results and displayed side-by-side, showing each code change. This feature is extremely helpful for lengthy and complex macros.

Top Features and Benefits

Advanced spreadsheet comparison

Compare Excel documents against modified versions. Workshare Compare for Excel utilizes industry - leading comparison technology to accurately compare long and complex spreadsheets.

Smart Compare

Identify inserted or deleted rows and columns with "Smart Compare" technology. This comparison technology deals intelligently with cells that have simply moved position within the workbook to reduce confusion and unnecessary noise.

Graphical change tracking

Graphically compare changes between two spreadsheets or spreadsheet versions and provide graphical, side-by-side and color-coded change comparisons.

Synchronized 3-pane view

Synchronize comparison views even when rows or columns have been added or deleted. Synchronization incorporates a bird's eye view of changes with graphical statistics.

Custom comparison options

Find differences in formulas, colors, values, structural changes, macros, and more.

Display changes side by side

Show changes side by side when compared values are too long to easily view and distinguish the differences.

Show formulas

Inspect the formulas in the workbooks by displaying the underlying formulas in cells, rather than the value that results from the formula.

Easily resize cells

Increase the cell size to see the complete cell value when contents are too large to be normally displayed.

Sync grids

Display the same sheet in each workbook. When selecting a sheet in one workbook the same sheet will be selected in the workbook being compared.

Detailed macro comparison

Workshare Compare for Excel enables detailed comparison of macros and VB code. Macro changes can be selected from the comparison results and displayed side-by-side, showing each code change. This feature is extremely helpful for lengthy and complex macros.

Export results

The results of a workbook comparison can be exported to a tab-delimited text file that you can open with Microsoft Excel.

Sheet	Range	Old Value	New Value	Description
Revenue W		Waterfall 2	Revenue Waterfall 2	Renamed Sheet At Position 2.
Revenue W	F24		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F25		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F26		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F27		=SUM(F24:F26)	Formula Added.
Revenue W	F30		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F31		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F32		= 'C:\Documents and Settings\	Formula Added.
Revenue W	F33		=SUM(F30:F32)	Formula Added.
Revenue W	F36		=+F24+F30	Formula Added.
Revenue W	F37		=+F25+F31	Formula Added.
Revenue W	F38		=+F26+F32	Formula Added.

About Workshare

Workshare, a long-time leader working with the legal industry's entrusted content, enables organizations to control and manage information securely. More than one million professionals rely on Workshare solutions to increase productivity and safeguard their confidential information; ultimately securing their intellectual property, customer relationships and the organization's reputation. Workshare's document comparison and collaboration solutions provide risk management and security to over 14,000 organizations worldwide. For more information, visit www.workshare.com.

SYSTEM REQUIREMENTS

Operating Environments:

- Microsoft Windows XP and above
- Microsoft Windows Vista (32 bit and 64 bit)
- Microsoft Windows 7 (32 bit and 64 bit)

Microsoft Office System:

- Microsoft Excel 2007 (to SP2)
- Microsoft Excel 2003 (to SP3)

Additional Support:

- Multilanguage support for ASCII and Unicode language documents and operating systems

Recommended:

- 2.2GHz Intel Core 2 Duo processor or equivalent
- 2GB RAM
- 2GB free disk space

Minimum:

- P4 2.8GHz + Pentium processor
- 1GB RAM
- 500MB free disk space

Note: Microsoft .NET Framework 3.5 is required

Workshare Compare Basic for Excel

A basic comparison product that only compares entered values within Excel spreadsheets is also available.

- United States
- United Kingdom
- Germany
- Hong Kong
- Australia
