

Microsoft Online Services

A Cost Effective and Reliable Alternative

Now you have a better choice that can help you respond flexibly to your businesses changing needs and unpredictable market factors.

Microsoft Online Services gives your business the powerful productivity capabilities of Microsoft Exchange Server, Microsoft Office SharePoint® Server, Microsoft Office Communications Server, and Microsoft Office Live Meeting—all hosted at Microsoft's secure and geo-redundant data centers – and all up and running quickly and easily without the upfront costs of an on-premise deployment. The suite of productivity tools enables your workers to communicate and collaborate effectively, while enabling your IT team to focus on more business-critical tasks. And with services hosted by Microsoft, you can have peace of mind knowing that experts are managing your IT and that your service will be available when needed.

Consider Micro Strategies, a Microsoft Gold Partner with Business Productivity Online Suite expertise, to help you assess your needs – getting you started for as little as \$5 per user per month. In addition, we have packaged offerings such as online mailbox setup, Outlook client setup, and data migration.

We know how important it is to trust a service provider with your business, and Micro Strategies provides best in class technology expertise and has attained a 96% customer satisfaction rating.

*“Optima is an ERP Solutions Provider and having offices globally relies heavily on email to collaborate and communicate with our customers and internal employees. We became interested in Microsoft Online Services as it is a cost-effective and reliable alternative for our business. **Micro Strategies** made the process seamless for us and gave us a good understanding of how this new environment will work for us. We moved all our email to Exchange Online and look forward to no more downtime!”*

Anupreet Khurana, CEO of Optima Technology Partners

Micro Strategies' Offer:

Tools for Assessing and Planning the New Wave of Microsoft Technology

Thinking about deploying, consolidating, or migrating to any of these new Microsoft technologies?

- Windows® 7 or Virtual Desktop
- Microsoft Office 2010
- Windows Server® 2008 R2, Hyper-V
- Exchange 2010
- Microsoft SQL Server 2008

If so, consider utilizing Micro Strategies to ensure that these upcoming projects attain the highest success rate for your IT department and end users.

Get a comprehensive overview of your current IT infrastructure and determine the most cost effective technology solutions to meet your IT needs, by using Micro Strategies to work with the **Microsoft® Assessment and Planning (MAP) Toolkit**. It is a powerful and secure tool for inventory, assessment, and reporting, for small or large IT environments – and doesn't require installation of agent software. The data collected and analysis performed is meant to simplify the planning process for your migration projects. This, coupled with Micro Strategies' deep technical skills and hands-on training capabilities, can be previewed in our **Microsoft Solution Center**.

Contact us to learn how we can help you with your upcoming projects to guarantee success!
