

DATA CENTER MODERNIZATION

Determining the best approach to modernizing your infrastructure can be challenging. Desiring the elasticity, simplicity and rich set of features that public cloud can offer, many businesses are taking a “cloud first” approach to their platform and computing needs. Yet migrating mission-critical workloads to the cloud can be both complex and risky as certain workloads are better supported through on premise solutions. When making a data-driven decision to remain on premise, it is still possible to take advantage of cloud-like capabilities within your data center.

A FOUNDATION THAT COMBINES TRADITION AND INNOVATION

Micro Strategies’ solutions are designed to allow you to deploy platforms that meet the reliability, performance and cost requirements for today’s modern workloads while also offering flexible and dynamic cloud features on premise. From traditional servers and storage to software-defined and hyper converged, these solutions include intelligent software layers that provide elasticity, scalability and easy, cloud-like provisioning. Many of these solutions are built with a hybrid strategy in mind and all of them consider upfront costs and on-going operational impact.

SOFTWARE-DEFINED FUNCTIONALITY

Expanded, cloud-like capabilities within your data center

COST MODEL OPTIONS

Flexible elastic and non-elastic choices

ADAPTABLE, FIT-TO- PURPOSE OPTIONS

Buy only what you need

BENEFITS

- > Maintain control of infrastructure
- > Leverage the flexibility provided by usage models designed for your organizational needs
- > Reduce the time spent manually provisioning required infrastructure and improve speed to market

24/7 SUPPORT FOR YOUR ORGANIZATION

Our experts don't just recommend and implement solutions – they can manage them too. We can provide 24/7 support to ensure your technology runs optimally so your employees stay focused on delivering business value.

Proactive monitoring, alerting and remediation for core infrastructure and network applications

Pre-determined escalation and remediation process

Simplified reporting and alerting

BENEFITS

- > Focus – Micro Strategies' staff focuses on managing your IT, allowing your staff to focus on more strategic objectives and your company to focus on its core business
- > Lower cost of ownership – Leverage our staff's expertise while only paying a recurring flat fee instead of paying for full-time support staff
- > Scalability - Resources can be brought on as needed, without the need to go through the hiring process
- > Flexibility – Services can be customized as needed with support levels being quickly scaled up or down as needed

WHY MICRO STRATEGIES?

Micro Strategies brings together the right mix of solutions and resources to address your unique challenges and help you use your data to drive results. From application development and DevOps to security and core infrastructure, our experts are able to design, develop, implement and operate solutions that drive business value. Beyond their technical expertise, our highly-skilled, certified team of professionals has hands-on experience as customers – giving them a unique perspective on the solutions that they design and implement for our clients.
